Bahamas Reef Environment Educational Foundation (BREEF)

BREEF's mission is to promote a sustainable relationship between Bahamians, visitors and the marine environment.

BREEF Links Science, Policy and Environmental Education
Teacher Training Public Education

Conservation Through Education
BREEF educates people about the underwater environment and how to protect it. An educated and aware public will call for action to sustain the marine resources upon which we all depend.

We need your support

- Become a member of BREEF (see reverse)
- Call on your public representatives to support marine conservation
- Know and abide by fishing regulations
- Teach others respect for the sea
- Respect the boundaries of marine protected areas

I enclose \$ _____ for my annual membership.

I enclose \$ _____ as a donation.

Thank you for your support.

Complete and return this portion by mail to BREEF, P.O. Box N-7776, Nassau, The Bahamas
Please make cheques payable to BREEF.

Support our fishermen, CHOOSE another fish during the Closed Season

Protect the Nassau grouper while they Reproduce

The closed season, December 1 to February 29, protects the Nassau grouper during most of its breeding season. This is when they are most **vulnerable** because they school in large numbers to spawn. The Nassau grouper is commercially extinct in most of the region. We need your help to protect it in The Bahamas.

Ask your local fisherman for lionfish-It's Tasty!

Lionfish is an **invasive** species that is rapidly reproducing in our waters, and eating our Bahamian fish.

Please eat lionfish to help reduce their numbers.

For more information, contact the Dept. of Marine Resources, Tel: 242 393 1777 or BREEF: Tel: 242 327 9000, www.breef.org, breef@breef.org
